#### PASSAGE

In our approach to life, be it pragmatic or otherwise, a basic fact that confronts us squarely and unmistakably is the desire for peace, security and happiness. Different forms of life at different levels of existence make up the teeming denizens of this earth of ours. And, no matter whether they belong to the higher groups such as human beings or to the lower groups such as animals, all beings primarily seek peace, comfort and security. Life is as dear to a mute creature as it is to a man. Even the lowliest insect strives for protection against dangers that threaten its life. Just as each one of us wants to live and not to die, so do all other creatures.

- I. The author's main point is that
  - (a) different forms of life are found on earth
  - (b) different levels of existence are possible in nature
  - (c) peace and security are the chief goals, of all living beings
  - (d) even the weakest creature struggles to preserve its life.
- J. Which one of the following assumptions or steps is essential in developing the author's position ?
  - (a) All forms of life have a single overriding goal
  - (b) The will to survive of a creature is identified with a desire for peace
  - (c) All beings are divided into higher and lower groups
  - (d) A parallel is drawn between happiness and life and pain and death

**Explanation :**

- I. The idea which represents the author's main point is "peace and security are the chief goals of all living beings", which is response (c). So (c) is the correct answer.
- J. The best assumption underlying the passage is "The will to survive of a creature is identified with a desire for peace", which is response (b). So (b) is the correct answer.

### PASSAGE—I

Popular illusions about birds extend further than the use of the word 'egg-shape' that would suggest that all eggs are alike. For instance, there is the popular idea that owls hoot. Actually, only very few owls hoot and these include the common brown or tawny wood owl. The white barn owl screeches; the little owl has a wailing cry; the long-eared owl barks; and the short-eared owl snorts ! Another mistaken idea is that all ducks 'quack', because the common farmyard duck is a domesticated form of the common wild duck or mallard that quacks. Actually most wild ducks call with whistles.

76. The main purpose of this passage is
- (a) to describe the life of popular birds.
  - (b) to show our incorrect ideas of bird life.
  - (c) to show our perfect knowledge about birds.
  - (d) to describe the calls of owls and ducks.
77. The impression created by repeating the terms, 'popular' and 'common' are
- (a) human beings are closely attached to birds.
  - (b) our ideas about birds are derived from the most common types.
  - (c) owls and ducks are our favourite birds.
  - (d) domesticated birds are our source of information about the bird world.
78. The common duck is not a separate species but a tamed version of wild variety because it
- (a) whistles like most wild ducks.
  - (b) grunts like the tufted duck.
  - (c) has the same call as other ducks.
  - (d) quacks like the mallard.

### PASSAGE—II

“What is sixteen and three multiplied ?” asked the teacher. The boy blinked. The teacher persisted, and the boy promptly answered : “twenty-four”, with, as it seemed to the teacher, a wicked smile on his lips. The boy evidently was trying to fool him and was going contrary on purpose. He had corrected this error repeatedly, and now the boy persisted in saying “twenty-four”. How could this fellow be made to obtain fifty in the class test and go up by double-promotion to the first form, as his parents fondly hoped ? At the mention of “twenty-four” the teacher felt all his blood rushing to his head. He

controlled himself, and asked again : "How Much ?" as a last chance. When the boy said the same thing obstinately, he felt as if his finger was releasing the trigger : he reached across the table, and delivered a wholesome slap on the youngster's cheek.

79. The boy answered the question
- (a) with fear and anxiety.
  - (b) with the intention to fail in the class test.
  - (c) to make some fun in the class.
  - (d) when the teacher persisted in asking.
80. The teacher felt blood rushing to his head because
- (a) there was an arrogant smile on the boy's lips.
  - (b) he thought the boy was hopelessly dull.
  - (c) he thought the boy made the mistake deliberately.
  - (d) the boy gave a wrong answer to such a simple question.
81. The teacher controlled his anger because
- (a) he remembered the fond hopes of boy's parents.
  - (b) he wanted to give another opportunity to the boy.
  - (c) the boy was too young to pick up mathematics fast.
  - (d) he believed that the boy must be taught the lesson again.

### PASSAGE—III

I was at the shop early. He was standing behind the counter and as soon as I saw him, I knew that there would be some unpleasantness. Mr. Higson is never at his best unshaven, in slippers and braces and smoking on the empty stomach. The atmosphere of the little shop was heavy with the bitter odour of fresh newspaper print and ink : stacks of crisp newspapers and magazines lay neatly on the counter, and Higson and the boy were making up the daily mend.

82. At the shop Mr. Higson appeared in
- (a) his joy of smoking.
  - (b) his most slip-shod condition.
  - (c) the most unusual condition.
  - (d) in a strange mood.
83. The overall atmosphere in the shop was
- (a) pleasant, wholesome and welcome.
  - (b) heavy with a lot of goods placed there.
  - (c) with the inactivity of the early morning.

#### PASSAGE—IV

A village must have some trade; and this village has always been full of virility and power. Obscure and happy, its splendid energies had found employment in wresting a livelihood out of the earth, whence had come a certain dignity, and kindness, and love for other men. Civilization did not relax these energies, but it had diverted them; and all the special qualities, which might have helped to heal the world, had been destroyed. The family affection, the affection for the commune, the sane pastoral virtues – all had perished. No villain had done this thing : it was the work of ladies and gentlemen who were rich and often clever.

84. Village life is praised by the author because it
- (a) helps villagers to achieve material prosperity.
  - (b) makes men complacent.
  - (c) breeds humane virtues.
  - (d) is free from the din and hurry of city life.
85. Civilization mainly destroys
- (a) the ability to create employment.
  - (b) family affection and pastoral virtues.
  - (c) medical facilities for the rural people.
  - (d) agricultural trade.
86. The tone used by the author in the last sentence of the passage is :
- (a) Lamenting
  - (b) Sarcastic
  - (c) Complimentary
  - (d) Ironic

#### PASSAGE—V

The art of growing old is one which the passage of time has forced upon my attention. Psychologically there are two dangers to be guarded against in old age. One of these is undue absorption in the past. It does not do to live in memories, in regrets for the good old days. One's thoughts must be directed to the future. This is not always easy; one's past is a gradually increasing weight. The other thing to be avoided is clinging to youth on the hope of sucking vigour from its vitality.

87. "By the art of growing old", the author means
- (a) some special skill by applying which one can grow old.
  - (b) that growing old is like creating a work of art.
  - (c) the acceptance of old age as a fact of life.
  - (d) the refusal on one's part to grow old.
88. The passage deals with the process of growing old. What does it describe ?
- (a) The decay of the senses in old age
  - (b) The psychological problems of old men
  - (c) The desire in man to grow old
  - (d) An old man's ability to recollect his past

89. "It does not do to live in memories". This statement means that
- the past is not contained in memories.
  - the old men are very forgetful.
  - old men often think of the past.
  - thinking of the past does no good to old men.
90. It is difficult for old men to think of the future because
- they are unable to think.
  - they do not know what the future is like.
  - the past occupies their minds.
  - their feeling that the past was far more happier than the present grows stronger day by day.

#### PASSAGE—VI

It was Galileo and Newton—notwithstanding that Newton himself was a deeply religious man—who destroyed the old comfortable picture of a friendly universe governed by spiritual values. And this was effected, not by Newton's discovery of the law of gravitation nor by any of Galileo's brilliant investigations, but by the general picture of the world which these men and others of their time made the basis of the science, not only of their own day, but of all succeeding generations down to the present. That is why the century immediately following Newton, the eighteenth century, was notoriously an age of religious skepticism. Skepticism did not have to wait for the discoveries of Darwin and the geologists in the nineteenth century. It flooded the world immediately after the age of the rise of science.

91. 'The old comfortable picture of a friendly universe' was :
- a universe governed by religious beliefs
  - a universe with men like Newton who were deeply religious
  - a universe investigated by Galileo and Newton
  - the century immediately following Newton
92. Religious skepticism arose because :
- Galileo and Newton were not religious, being scientists
  - Newton discovered the law of gravitation
  - of the discoveries of Darwin and the geologists of the nineteenth century
  - of the picture of the world that became the basis of science after the seventeenth century

#### PASSAGE—VII

Although Louis Braille died when he was only forty-three years old, he succeeded in devising a system of reading and writing for the blind which is now taught all over the world. Braille lost his sight accidentally as a child. Nevertheless, he was able to complete his education at a school for the blind in Paris and became a teacher. In his day, the few books that were available for blind people were printed in big, raised type; the letters used were those of the ordinary alphabet. The reading of such books

required immense effort. Not only that, writing was almost impossible, for a blind person was still restricted to an alphabet which was extraordinarily difficult to reproduce on paper. Braille's idea was to use raised dots, instead of raised letters. He evolved a system, which made use of only six dots in all. By various combinations of these dots, it not only proved possible to represent each letter in the alphabet, but punctuation marks, numbers and musical notation as well. Reading and writing for the blind have thus become enormously simplified. The sensitive fingers of a blind person can travel rapidly over the dots; and there is a small machine, something like a typewriter, which enables the blind to write quickly and clearly.

93. Louis Braille :

- (a) was born blind
- (b) lost his sight when he was a child
- (c) lost his sight accidentally when he was forty-three years old
- (d) was not blind, but studied at a school for the blind

94. Before Braille's invention, the blind had difficulty in reading because :

- (a) there were only printed books
- (b) there were no schools for the blind
- (c) the few books available used the raised letters of the ordinary alphabet
- (d) the books meant for the blind were heavy

95. Braille's system uses :

- (a) only six dots
- (b) numbers and musical notation
- (c) ordinary alphabets in big raised type
- (d) a combination of alphabet and punctuation

96. Braille's system allows the blind

- (a) to write with ease
- (b) to read easily
- (c) to read as well as write with ease
- (d) to read easily but to write with great effort

#### PASSAGE—VIII

The Indian culture of our times is in the making. Many of us are striving to produce a blend of all cultures that seem today to be in clash with one another. No culture can live, if it attempts to be exclusive. There is no such thing as pure Aryan culture in existence in India today. Whether the Aryans were indigenous to India or were unwelcome intruders, does not interest me much. What does interest me is the fact that my remote ancestors blended with one another with the utmost freedom and we of the present generation are a result of that blend.

I do not want my house to be walled in, on all sides and my windows to be stuffed. I want the cultures of all lands to be blown about my house as freely as possible. But I refuse to be blown off my feet by any. I would have any young men and women with literary tastes to learn as much of English and other world-languages as they like, and then expect them to give the benefits of their learning to

India and the world alike like a Bose, a Ray or Tagore. But I would not have a single Indian forget, neglect or be ashamed of his mother tongue, or feel that he or she cannot think or express the best thoughts in his or her own vernacular. Mine is not a religion of the prison house.

97. The author views Indian Culture as :

- (a) pure Aryan culture
- (b) a clash of cultures
- (c) a continual blend of cultures
- (d) the culture of remote ancestors.

98. The author thinks that :

- (a) the Aryans were indigenous to India
- (b) the Aryans were unwelcome intruders
- (c) the question whether the Aryans were indigenous or not is not of interest
- (d) the culture that we have inherited is the Aryan culture.

99. The author wants :

- (a) the cultures of others to be kept out
- (b) the cultures of others to replace our old culture
- (c) the freedom to blend other cultures with our own
- (d) the preservation of the culture of our ancestors.

100. The author wants Indians to :

- (a) learn only English, as much as they like
- (b) learn English and other world languages
- (c) learn only the mother tongue or the vernacular
- (d) learn English and other world languages in addition to the mother tongue.
